

Innovative Engineering Inc.

SPECIALTY STRUCTURAL ENGINEERS

Over the almost 25 years we have been in business, we have discovered niche markets within our industry that require specialized skills. Consequently we spend about 4 times the national average on training. As a result, our firm attracts highly intelligent, experienced and talented engineers that are lifelong learners. This has allowed us to become sought after experts, authors, and speakers for the following specialties:

BUILDING ENVELOPE

THERMAL IR INSPECTION

FAÇADE INSPECTION

FAA PART 107 DRONE INSPECTION

FALL PROTECTION DESIGN

RESTORATION

PARKING STRUCTURES

MARINE STRUCTURES

NDT SOUNDING

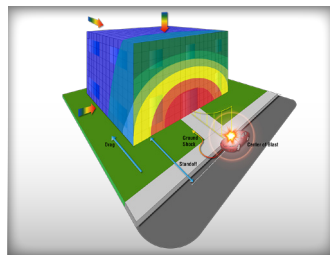

DESTRUCTIVE TESTING

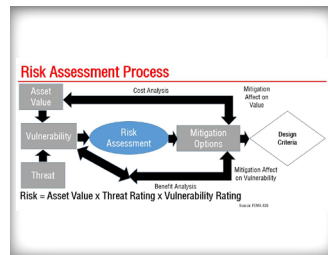

PHYSICAL SECURITY

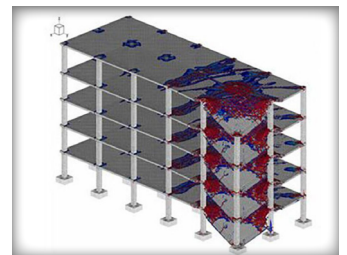

FACILITY HARDENING

BLAST DESIGN

SECURITY RISK ASSESSMENT

PROGRESSIVE COLLAPSE

STRUCTURAL ENGINEERING

Starting in 1995, traditional structural engineering of buildings and similar structures has and continues to be the foundation of our firm. We have found that the traditional and specialty services that we provide complement each other. This being said, we are accustomed to working alongside and supplementing the Structural Engineer of Record (SER), respecting their client relationship.
